http://www.cimat.mx/es/Probabilidad_y_estadistica

The research areas of interest in the Department in recent years have been: Statistical Inference, Computational Statistics, Inference in Topological Data Analysis, Statistics for Random Networks, Natural and Social Sciences, Reliability, Time Series, among others. Outstanding candidates in the area of statistics interested in these topics or others that would complement or enhance them are desired.

Preference will be given to candidates with excellent accomplishments in research in these areas or with outstanding potential, with no more than 15 years from graduation. The candidates must be pursuing a vigorous research career that will yield major contributions within the next few years, going beyond the doctoral dissertation. Excellent teaching abilities (in English or Spanish) and inclination to mentoring students of diverse backgrounds are also desirable.

Applicants should submit the following information:

- cover letter,
- curriculum vitae,
- list of publications,
- a statement describing current and planned research for the next three years,
- at least two letters of recommendation, they should be sent directly to rivero@ciamat.mx.

These must be sent to Dr. Víctor Rivero (rivero@ciamat.mx), Chair of the Probability and Statistics Group, CIMAT, via email in pdf format.

Applications will be accepted and reviewed until the available positions are assigned.
