

Postdoctoral Positions in Applied Mathematics at the School of Applied Mathematics - FGV

The School of Applied Mathematics ([EMAp](#)) of the Getúlio Vargas Foundation ([FGV](#)), Rio de Janeiro, is opening **two postdoctoral researcher positions in Applied Mathematics for a two-year period with a monthly fellowship of BRL 10.000,00 (after taxes)**. The Department has research groups in Applied and Computational Mathematics including Statistics, Optimization, Stochastic Methods, Data Science, Quantitative Finance, Optimal Control and Epidemiological Modelling.

The positions are intended for applicants working in Applied and/or Computational Mathematics, having research interests that intersect those of the current faculty of the school.

Candidates must have completed their doctoral degree after March 31st, 2014 or are about to complete it. A PhD degree is required by the starting date of the contract.

Applications should be sent to the email: posdoc.emap@fgv.br until April 1th, 2019; including the following information:

- Research plan
- Publications' list
- Curriculum Vitae (containing, at least, birth date, institution and date of doctoral degree, thesis title and advisor's name)
- Three reference letters (free format) (to be submitted directly by the reference writers, to the email posdoc.emap@fgv.br until April 1th, 2019)

The postdoctoral researchers are expected to focus on scientific research, but may also be required for a light teaching duty.

The selected candidates should start their activities at EMap between August 2019 and December 2019.

The decision will be announced on May 15th, 2019.

Further inquiries should be addressed to posdoc.emap@fgv.br

(This announcement is published online [here](#).)
