

EDUCATION TECHNOLOGY AND COMPUTATIONAL PSYCHOMETRICS SYMPOSIUM OCT 9-10, 2019

CFP open for #EdTech and Psychometrics Research

Make an impact, showcase your research, demo your product, and network with professionals working at the forefront of computational psychometrics and education technology. Innovative students, educators, entrepreneurs, and researchers are invited to submit their best work for consideration. Accepted submissions will be presented at the ETCPS 2019 research poster and tech demo reception on Wednesday, Oct. 9 from 5-7 pm at the Coralville Marriott Hotel in Coralville, IA. If your submission is accepted, you or a representative must be present to showcase your work.

We're accepting submissions for a limited number of poster presentations.

Deadline: Sept. 13.

Poster submissions should broadly address one or more of the following areas:

- **Classroom Implementation** – Submit proposals geared toward bringing education technology into classrooms. Presentations incorporating opportunities, challenges, and outcomes of these implementations are highly encouraged.
- **Emerging Technology** – Submit your research or tech demo focusing on technology aimed toward digitizing the classroom, learning and assessment experiences, and academic and career navigation.
- **Novel Research** – We will consider a wide range of relevant work, ranging from psychometric models and simulation studies to data mining and artificial intelligence.

Previously published papers and posters will also be considered. [Submit your poster today!](#)

Tech Demos: If you have an innovative edtech product or prototype you'd like to showcase, please contact us at actnext@act.org with your proposal. Tech demonstration space is limited and competitive - let's see what you've got!
